水冷系列冷水机

与传统风冷式冷水机相比不需要风机进行冷却，减少运行噪音同时减少对操作空间的热量排放，更绿色节能！产品利用外部循环水配合冷水机内部进行高效制冷，更小的体积带来更大的制冷量，可释放更多机台的空间！

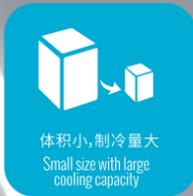

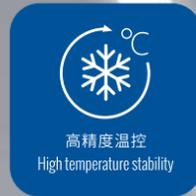

Water-cooled Water Chiller

Compared with the traditional air-cooled chiller, this water-cooled chiller does not need the fan for cooling, reducing noise and the heat emission to the operating space, which is more green energy-saving! It uses external circulating water working with the internal system for efficient refrigeration, smaller size with larger cooling capacity and less space occupation.

从2017年起, 我司部分产品的标签除基本型号名称外, 会增添一个配置码。

配置码会显示在产品参数标签上, 如某款6000AH机型的其中一个配置码是4530。

通过配置码可以查询特域冷水机的功能参数、主要零件、外观及客户需求等信息, 同时也缩短了机器型号的长度, 加快了客户的采购过程以及为客户提供更精准的售后服务。
From 2017, in addition to basic model name, a configuration code is added on the nameplate of some of our products. Configuration code is indicated on the product nameplate. For example, one of the configuration codes of model 6000AH is 4530.
With configuration code, we can check the chiller's functional parameters, key components, appearance, customized information, etc.
It not only shortens the chiller's model name but also expedites customer's procurement process and enables us to provide more accurate after-sale service.
